PYRO PROTECTIVE CARBON FIBER FLAME BLOCKERS DT SERIES

A revolutionary patented high-tech carbon fiber product that withstands temperatures up to 3000°F and is fire and heat resistant. Available in several different styles: Welding Blanket, Torch Shield and Hand Gloves. Pyro products are lightweight, soft and flexible. Pyro material has been thoroughly tested to the standards of the National Fire Protection Association, which also certifies fireman's protection gear. A wide range of uses for each type of Pyro product:

WELDING BLANKET DT450

- Size 50" X 80"
- Protection from direct contact with weld splatter
- Reduces the chance of sparks damaging fabric, pitting glass or marring paint. Blanket will not scratch any painted surface.
- Flexibility of blanket it to be tucked into to protect surrounding areas from heat or flames from welding, soldering and brazing.
- Can be used in emergencies to smother small fires.

TORCH SHIELD DT440

- Size 10" X 18"
- Protect surfaces from sparks or open flames from gas torches.
- Withstands even the extreme heat of acetylene torches
- Protects wood, painted and other flammable surfaces while performing repairs.
- Perfect for repairs on autos and motorcycles without having to disassemble parts. Just stuff in around behind areas that require welding or soldering.

PYRO GLOVES DT420

- Work sooner! Work longer! Work safer!
- No more waiting for parts to cool, Heat blocking, flame resistant knit work gloves
- 10" wrist length, Heavy-duty fabric, ambidextrous fit, sold in pairs.
